Draft Value for Money Profile - September 2014

Introduction

The purpose of the profile is to help you compare your force's performance and resources with other forces. It is:

- Designed for use by force management and the local policing body as well as HMIC.
- Wide ranging; covering a large amount of information in a single, easy to use, document.
- Presented in a single format to enable you to target attention on the key differences which require explanation and action to improve.
- Timely - being published during October, when key budget decisions are being taken.
- Designed to give information, not judgements. The information in the profile is not a league table or targets.

Main changes to this year's profile

- 1 Some changes to the POA definitions and categories such as the introduction of Events policing under Operational Support, the removal of interpreters and translators from Criminal Justice Arrangements and the merging of Contact Management Units and Central Communications Units under Dealing with the Public.
- 2 Additional data on collaboration (included in the Use of Resources pages and Appendix 5)
- 3 Additional data on incidents - including trends since 2012/13 and comparisons between recorded crime and crime-related incidents.
- 4 An updated page on Police and Crime Commissioner/Local Policing Body costs following an update to the data collected under this heading.
- 5 Removal of the victim satisfaction page due to the difficulty in making meaningful comparisons between forces.

Frequently asked questions

What rule is used to highlight particular differences?

The difference is highlighted if the indicator puts the force in the top or bottom 10 per cent and the effect of the difference is greater than £1 per head of population.

What population figures do you use?

The profiles use the mid 2012 population estimate to align with Home Office and ONS publications.

Updating the data in your profile

To ensure that the data is as accurate as possible, we are asking forces to review their draft profile and update their data where necessary.

- Changes to the finance data (POA) need to go directly to CIPFA (Jonathan.Kefford@cipfa.org).
- Changes to Annual Data Requirement data must go directly to the Home Office via the usual channels.

All changes must be submitted by **10 October 2014**. Please copy HMIC (email below) into any changes so that we can extract the latest

If you have any comments on the format or analysis in this draft profiles please contact us as there may be scope to make minor changes

We are planning to publish the final profiles at the end of October 2014.

How much do officers in the force cost compared with others? How much overtime do they receive?

2013/14, £ per head of population

Police officer costs are split into percentage of the overall salary

Budgeted FTE numbers for the Office published FTE figures (A) The two figures are not directly

1. The profiles use 'logic trees' to take each area and break it down (from left to right) into component parts. For each breakdown, you can see how the force compares to other forces in its most similar group, as well as all forces in England and Wales.

2. The force has some of the highest officer costs per head of population nationally...

4. This chart shows a breakdown of the previous chart, revealing overtime has little bearing on officer costs.

6. The force has more officers per pop than national average, equating to a difference in cost of £17.2m (see table).

7. The cost of individual officers in the force is relatively low.

3. ...equating to a difference of £15.5m to national (all) average.

5. The force spends little (as a proportion) on overtime.

Section One – Costs, workforce and demand/performance

This section looks at how a force deploys its workforce and the associated costs for each of the 12 headline categories within the Police Objective Analysis (POA). POA subcategory information on costs is also presented.

POA estimates are used for all cost and workforce data unless stated otherwise. These data are taken as a snapshot as at 10 October. Any updates to the data made after this time will not be reflected in the profile. Home Office Annual Data Requirement (ADR) data is used where relevant POA data is not available. Examples include officers by rank, sickness rates, restricted/recuperative duty rates, officers' length of service and leavers/joiners.

With the exception of special constables, workforce data comprises full-time equivalent (FTE) figures. In POA estimates these are calculated as the number of staff budgeted for each staff type. Police workforce figures published by the Home Office are based on those in-post as of 31 March and 30 September of each year. The two sets of figures are not, therefore, directly comparable.

Key to the data and calculations

Net revenue expenditure: The profiles use a different calculation for net revenue expenditure to the Chartered Institute of Public Finance and Accountancy (CIPFA); it is calculated as total expenditure minus earned income to show the total cost of policing to the taxpayer.

Earned income: Where earned income is referred to, this covers partnership income, sales fees charges and rents, special police services, reimbursed income and interest.

Averages: All averages in this section (unless otherwise stated) are simple, unweighted England and Wales averages, including the force in question. As the Metropolitan Police and City of London Police data distorts the chart scales, they have been excluded from all charts and averages except for those in their own profiles.

Difference to most similar group (MSG) / All force: Differences are calculated on standardised data, as opposed to absolute values.

Calculation is as follows: (Force cost per head - MSG cost per head) multiplied by population = absolute cost of difference

Police officer as spend % of gross expenditure: We have chosen to show the proportion of spend on officers (including overtime) by function.

Calculation is as follows: (Police officer spend + Police officer overtime) / Gross Revenue Expenditure (GRE) = police officer spend as % of GRE.

National policing: To more accurately compare forces, national policing is not included in totals of spend and workforce (unless stated otherwise).

Operational front line, frontline support and business support: In HMIC's *Policing in Austerity: Rising to the Challenge* (July 2013), ADR data was used to split the police workforce into these three groups. Here, we map these categories using POA data for consistency with the rest of the profile. Since counter-terrorism/special branch is a national policing function, we do not include this as a front line role (for the reason given above). Due to this, and the previously described differences between the ADR and POA workforce data, the totals and proportions may not match those published elsewhere. The list of POA categories and their classifications are given in Annex 3.

Please note that, throughout the profiles, rounding may cause apparent discrepancies between totals and the sums of the parts.

How to use this section

Users may wish to focus on those charts where the force is an outlier, i.e. where they are significantly different from the average. Outliers are highlighted with blue chevrons and indicate that the force falls within the highest or lowest 10% and, where applicable, the financial value is greater than £1 per head. They should consider exploring the reasons for any differences by looking at the force as a whole, using relevant local knowledge. Staffing levels should also be considered in the context of workforce modernisation, collaboration efforts and the outsourcing of services.

Please note that, in some cases, not all plots are given; room is given to those areas with the highest costs. Further, throughout the profiles the chart scales vary and as a result the differences shown may not be as significant as they first appear.

Income and expenditure - Overview

How much does the force spend in each area of business compared with others? How much does it earn in income?

Cost per head of population

The profiles calculate net revenue expenditure (NRE) as total expenditure minus earned income to show the total cost of policing to the taxpayer. Note that this is different from NRE as reported in the raw POA data.

To compare forces, national policing functions (such as counter-terrorism/special branch) are excluded from the data analysis and charts.

Income and expenditure - Spend by function

What proportion of spend is on the front line or in business support compared with others? What proportion is spent in visible functions?

Cost per head of population

Police workforce roles are split into three categories: operational front line, frontline support and business support. The front line is further broken down into visible and non-visible roles (see Annex 3 for a breakdown by POA category). These plots show the NRE in each category. To compare forces, national policing functions are excluded.

Collaboration and outsourcing affect workforce numbers so costs, rather than FTE figures, are presented.

Note that in *Policing in Austerity: Rising to the Challenge* (July 2013), HMIC define frontline support as *operational support*. Since this is the name of a POA category, *frontline support* is used here to avoid confusion.

Income and expenditure - Non-staff costs

Apart from on the workforce, where else is the force spending money compared with others?

2013/14, non-staff costs as a percentage of workforce costs

Workforce costs include officer, staff and PCSO salary and overtime costs only. Temporary and agency costs are classified as non-staff. To compare forces, national policing functions are excluded.

Non-staff costs are broken down into specific types of running costs. They are shown as a percentage of workforce costs as they are largely dependent on the size of the workforce. Note that collaboration and outsourcing will affect the figures for some forces.

Income and expenditure - Financing

How much money does the local policing body receive in funding compared with others and from where? What is the level of council tax in the force and how does that compare with others?

Funding per head of population

Central funding is broken down into formula-based funding*, and government grants, which are not formula based. Local funding is comprised of council tax, use of reserves and council tax support grants.

Note: forces in Wales did not receive an increase in government grant for agreeing to freeze or reduce council tax but did receive a four year grant from the Welsh Assembly Government for an additional 500 PCSOs across Wales.

To show a typical council tax payment in the force, Band D tax rates (from CIPFA estimates) have been included. The yield shows the amount, from every £1 of council tax collected, that goes to the local policing body.

Income and expenditure - Funding trends

How has the local policing body's income changed over time compared with others?

Please note that estimates of reserves are unreliable and that these figures are not adjusted for inflation. The change over time is, therefore, a nominal and not a real change. The Band D council tax rates are from CIPFA estimates.

Note: change for 09/10 to 13/14 for reserves has not been given due to values crossing zero, with the potential for false negatives.

Income and expenditure - NRE by function - Police and Crime Commissioner/Local policing bodies

What is the expenditure of the local policing body on its own office and non-policing commissioned services?

Broadly, 'Cost of PCC/Deputy Mayor for Policing and Crime' includes salary and associated costs (including expenses and training) of the PCC, deputy PCC and any appointed deputies and special advisors. For the Metropolitan Police Service this relates to the Deputy Mayor for Policing and Crime and similar staff and costs. PCC salaries are set by the Senior Salaries Review Body.

'Office of PCC/local policing body & other costs' includes salary and associated costs of the Chief Executive, Chief Finance Officer and any other staff employed to support the PCC/ Deputy Mayor as well as office -running costs. It also includes other local policing body costs such as external audit and council tax leaflets.

PCC Commissioned services includes

- services previously commissioned under the community safety fund grant (monies previously allocated separately for community safety, now combined within the main grant to PCC/local policing body)
- victim and witness services including restorative justice (RJ)
- services directly commissioned by the PCC
- costs associated with the commissioning of the 2013/14 Ministry of Justice grant.

The split between Community Safety and Victims/Witnesses/RJ/Other costs is based on percentage of gross PCC Commissioned Services spent on Community Safety.

The data on the office of the PCC should be read with caution as staff numbers will vary according to the local context. Some staff within the OPCC may be providing a dual service to the force, for example, finance, communications or analysis teams. Also, the transition of staff from employment by the police authority to the PCC and Chief Constable may have an impact on staff numbers. This transition was undertaken in two stages. The first transferred all staff (not police officers) to the employment of the PCC, the second covered the return of operational staff to the Chief Constable. The PCC retained some functions under this process and these may not be consistent across all OPCCs.

Note that HMIC do not inspect expenditure incurred by local policing bodies/PCGs.

Workforce - Summary

How big is the force's workforce compared with others? How many officers, staff, PCSOs and special constables do they employ per 1,000 population?

Figures in the charts give the total number (including those within national policing) of FTEs (or head count for special constables) per 1,000 population.

All data is from POA except for contractors - which comes from ADR and is 2013/14 FTE.. Special constables data is a head count.

Workforce - Officers

How are officers in the force apportioned across operational front line, frontline support and operational support?

2013/14 estimates

HMIC split police workforce roles into three categories using the ADR601 functions: operational front line (including visible and non-visible), frontline support* and business support.

We have mapped the ADR601 categories to the POA data for use here. For consistency to elsewhere in the profile, we have removed counter terrorism/special branch (a national policing function) from the front line. Due to this, and the fact that ADR601 data deals with officers in post as of 31 March whereas POA data is of budgeted posts for the whole financial year, proportions will not necessarily match to other published figures. Annex 3 shows a list of POA functions and their classification.

Note that collaboration/outsourcing will affect staff/non-staff costs for certain forces

* In *Policing in Austerity: Rising to the Challenge* (July 2013), HMIC define this role as operational support. Since this is the name of a POA category, frontline support is used here to avoid confusion

Workforce - Officers/PCSOs by rank

How are officers in the force split amongst the ranks compared with other forces?
 What is the supervisory ratio of sergeants to constables (and PCSOs) compared with others?

March 2013

Charts show the proportion of the total officer/PCSO workforce at each rank. The chart for superintendents includes chief superintendents, and the chart for inspectors includes chief inspectors. Association of Chief Police Officers (ACPO) are officers above the rank of chief superintendents.

Two further charts show numbers of constables (and PCSOs) per sergeant giving an indication of the average supervision requirement for each sergeant.

Workforce - Mix of officers/staff

In functions where officers and staff can fulfil similar roles, what proportion of these functions are made up of police staff compared with other forces? How has that changed?

Data shows the proportion of workforce who are staff across the functions outlined below. To show the comparison between two years, data for 2012/13 and 2014/15 are given.

The categories below have been chosen since they highlight areas where change is occurring.

Care should be taken when examining functions with a small workforce. Exclamation marks are used to indicate categories which have fewer than 20 FTE officers and staff in total.

Note that collaboration/outourcing will affect staff numbers for certain functions in some forces.

Workforce - Leavers

What proportion of the workforce left the force last year and how does that compare with other forces?

These charts show the number and percentage of the workforce (FTEs) that left the force between 31 March 2013 and 2014 (using 31 March 2013 totals figures to calculate percentage of workforce).

Officers are broken down into those who transferred or left the service. We have costed the salary impact of the workforce leaving the service to give some context. However, PCSOs leaving forces may return as police officers.

Note that this is ADR data and so workforce totals will not match the POA data given elsewhere.

Workforce - Sickness and recuperative/restricted duty

What proportion of the force's workforce are absent and what proportion of officers are on restricted/recuperative duty? How do these rates compare with other forces?

These charts show sickness broken down into short and medium term (28 days and less) and long term (more than 28 days).

Officers on restricted duties (i.e. officers who, because of a disability or other factors, are unable to undertake the full range of operational duties) and recuperative duties (officers returning to work in a phased way after injury or illness) are included separately.

Note that the gaps towards the left of some charts indicate that data is not available or has not been included; absence above 12% of the workforce and zero absence have been excluded as it is likely to be due to data inaccuracies.

Note also that this is ADR data and so workforce totals will not match the POA data given elsewhere.

Workforce - Officers' length of service

What is the age profile of officers in the force compared with others? How many officers are projected to retire over the next few years and what are the estimated savings from them doing so?

The projected number of retirees is shown for officers with 25-30 years' service.* The estimated saving of them retiring is also provided, calculated from the average cost of a police officer. This does not take into account replacements. Data is given as headcount.

Demand - Crime trends

How is the number of crimes and charges per officer changing over time in the force and how does this compare with others?

Total crimes (excluding fraud) is included but not broken down into the different crime-types to ensure there is sufficient data to show. Note that PCSOs are not included and officer/staff numbers are given in FTEs. This data is from ADR and so will not match the POA data given elsewhere.

To enable the trends data series to be plotted together, each series has been indexed to 100%, i.e values are expressed as a percentage of the 2007/08 value.

Demand - Recorded crimes per visible officers

How does the number of crimes per visible police officer in the force compare with others?

March 2014 workforce, 2013/14 crime

While police officers are not just dealing with crime, the numbers of crimes per visible police officer gives some indication of how the crime workload for this force's visible officers compares with other forces.

Note that PCSOs are not included. Visible roles are defined in Annex 3.

Demand - 999 calls

What is the level of demands on the force from 999 calls compared with others? How much does dealing with these calls cost compared with others and what is the level of workforce required to deal with them?

Costs and workforce levels are calculated across central communications units (CCU) and also within CCU and front desk combined to account for differences in force structure.

Note that, for consistency with elsewhere in this section, the horizontal lines in the bar charts represent the average of all forces, not the MSG average.

Also, note that the 2014/15 data collection did not include the separate heading of "Contact Management Units".

Demand - Emergency and priority incidents

What is the level of emergency and priority calls in the force compared with others? How have these levels changed?

All police forces record incidents in accordance with the provisions of the National Standard for Incident Recording (NSIR). While incidents are recorded under NSIR in accordance with the same 'victim focused' approach that applies for recorded crime, these figures are not subject to the same level of quality assurance.

Incident counts should be interpreted as incidents recorded by the police, rather than reflecting the true level of victimisation. Other agencies also deal with anti-social behaviour incidents (for example, local authorities and social landlords); incidents reported to these agencies will not generally be included in police figures.

Incidents are separated into anti-social behaviour (ASB) incidents, crimes (notifiable, classified command and control) incidents and other command and control incidents.

New charts have been added to show changes since last year and the ratio, expressed as a percentage, of crime incidents to total crimes (exc. fraud & forgery). These charts may help identify any concerns re data quality/consistency.

Section two - Offences and outcomes

Introduction

This section focuses on criminal offences recorded by each force and resulting outcomes. The Office for National Statistics (ONS) has developed a new approach to presenting crime statistics to help ensure a clearer, more consistent picture on recorded crime for the public. The new crime “tree” (the crime types organised into a logic tree format, see below) has been devised and used here to present recorded crime, outcomes and the change in recorded crime over time. The intention is to differentiate between crimes that are victim-based, and those that are driven by police activity.

The ONS crime tree

To note:

- Data is shown as offences per 1,000 population (using mid-2012 estimate).
- Definitions of offences in each category can be found in Annex 1.
- Fraud is excluded from all crime to make comparisons between forces more meaningful. It is a deceptive crime, often targeted at organisations rather than individuals, is inherently difficult to measure and, in particular, to assess where it has originated.
- Changes over time for crimes and 'former detections' (see below) are measured against a baseline of 2010/11.
- MSG (simple, unweighted) averages are generally used in this section. The exception is noted in the following bullet.
- Expected 'former detections', charges and cautions are calculated by modelling how many the force would have if they aligned to the national average. Here, weighted average is used so that the national average is closer to 100%

Outliers are not included for the crime data. A force may, broadly, be considered an outlier if it is in the highest or lowest 10% of values and there is considerable variation between forces.

Detection terminology

The Home Office has introduced a new way of classifying the results of police investigations. New classifications called 'outcomes' are associated with all recorded crimes, providing a more detailed picture of how the police deal with investigations. It includes, for example, the full range of possible disposals including community resolutions. Data for these will be available in next year's profile. In the meantime, we use former "detection rates" which include the following outcomes:

- **Caution** - police have identified a suspect and issued them with a caution which is officially recorded against their name.
- **Fixed penalty notice** for disorder - a fine issued by the police for anti-social behaviour, as well as shoplifting, criminal damage and possession of cannabis which are recorded on the police national database.
- **Charge summons** - the suspect has been charged and/or brought to court.
- **Taken into consideration (TIC)** - offences which are considered in conjunction with other offending, often more serious offences. TICs can include crimes that have not previously been recorded, providing the victim confirms that the offence occurred.
- **Cannabis warning** - specific warning recorded for cannabis use.

Please note that the former "detection rates" provided can be above 100% where outcomes and crimes are recorded in different time periods. This can be particularly noticeable where crimes are proactively found or have very small numbers. For display purposes all former "detection rate" graphs have been capped at 100%.

Note that, in this section, horizontal lines in the plots show the MSG average and not the average of all forces.

Offences and outcomes - Crimes (excluding fraud) - Recorded crime

What is the recorded crime rate for crimes (excluding fraud) in the force and how does this compare with others?

Recorded crime rate (per 1000) refers to the number of recorded offences per 1000 population for 2013/14

Population		1,469k			
	Recorded offences	per 1000	MSG Avg	Difference*	
Victim-based crime	87,839	59.8	57.8	3,002	3%
Other crimes against society	7,533	5.1	6.1	-1,413	-19%
Crimes (excl fraud)	95,372	64.9	63.8	1,589	2%

* Net difference in the number of offences compared to if the force had the MSG average per 1,000 population. A negative difference means the force has a lower recorded crime rate than the MSG average.

Source: ONS Crime Statistics 2013/14

Offences and outcomes - Crimes (excluding fraud) - Former detection rates

What is the former detection rate for all crime (excluding fraud) in the force and how does this compare with others?

For important information on understanding former 'detection rates' see the introduction to this section. In particular, differences in forces' policies (e.g. on restorative justice, 'taken into considerations' and community resolutions) will impact on former detection rates.

	Offences	SDs	%	MSG Avg	Diff*
Victim-based crime	87,839	21,576	25%	23%	724
Other crimes against society	7,533	5,204	69%	68%	40
Crimes (excl fraud)	95,372	26,780	28%	28%	765
Actual % expected			115%		

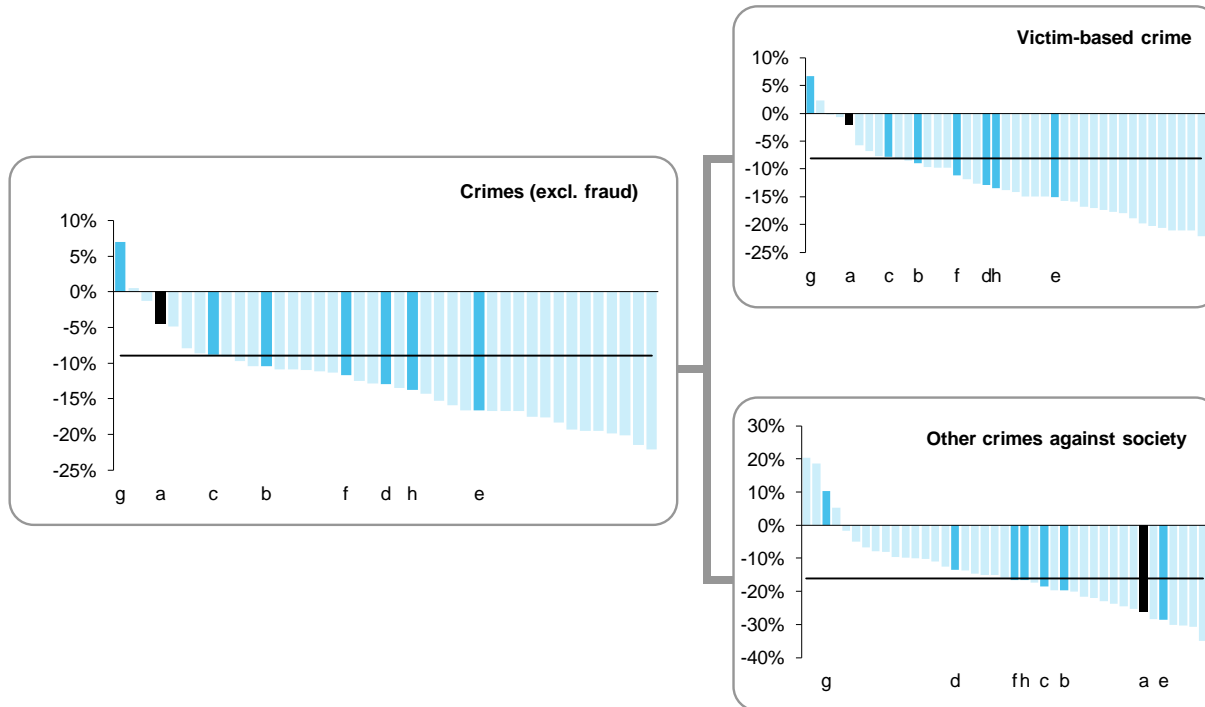

The actual % expected figures shows the actual former detections divided by the number of such detections the force would achieve if it was performing in line with the average of all forces for each crime type. Hence if above/below 100%, you are achieving more/fewer detections than the average.

* Net difference in the number of outcomes ('former detections') compared to if the force had the MSG rate. A positive difference indicates a higher number of detections for this force than expected based on the detections reported by MSG forces.

Offences and outcomes - Violence against the person - Recorded crime

What is the recorded crime rate for violence against the person in the force and how does this compare with others?

Recorded crime rate (per 1000) refers to the number of recorded offences per 1000 population for 2012/13.

Note that, since homicide numbers are so small, care should be taken when making comparisons between forces. For this reason, a plot has not been included for homicide.

Offences and outcomes - Violence against the person - 2010/11 - 2013/14

How does the recorded crime rate for violence against the person compare with four years ago and how does this compare with others?

These graphs show the recorded crime rates for violence against the person offences compared to four years ago.

Note that since homicide numbers are small, care should be taken when making comparisons between forces or over time. For this reason a comparison of homicide rates between two time periods has not been shown in graph form as the small numbers involved would result in large variations in rates and could be visually misleading.

Offences and outcomes - Sexual offences - Recorded crime

What is the recorded crime rate for sexual offences in the force and how does this compare with others?

Recorded crime rate (per 1000) refers to the number of recorded offences per 1000 population for 2012/13.

Please note: due to the complex nature of these crimes, particularly rape, care should be taken when comparing crime rates across forces as there are many factors which can affect the level of recorded crime. For example, victims being encouraged to report crimes or cultural differences.

Offences and outcomes - Criminal damage and arson - Recorded crime

What is the recorded crime rate for criminal damage and arson in the force and how does this compare with others?

Recorded crime rate (per 1000) refers to the number of recorded offences per 1000 population.

Population		1,469k			
	Offences	per 1000	MSG Avg	Difference*	
Criminal damage	16,291	11.09	10.19	1,326	8%
Arson	563	0.38	0.43	-73	-13%
Criminal damage and arson	16,854	11.47	10.62	1,253	7%

* Net difference in the number of offences compared to if the force had the MSG average per 1,000 population. A negative difference means the force has a lower recorded crime rate than the MSG average.

Offences and outcomes - Criminal damage and arson - Former detection rates

What is the former detection rate for criminal damage and arson in the force and how does this compare with others?

For important information on understanding former 'detection rates' see the introduction to this section. In particular, differences in forces' policies (e.g. on restorative justice, 'taken into considerations' and community resolutions) will impact on former detection rates.

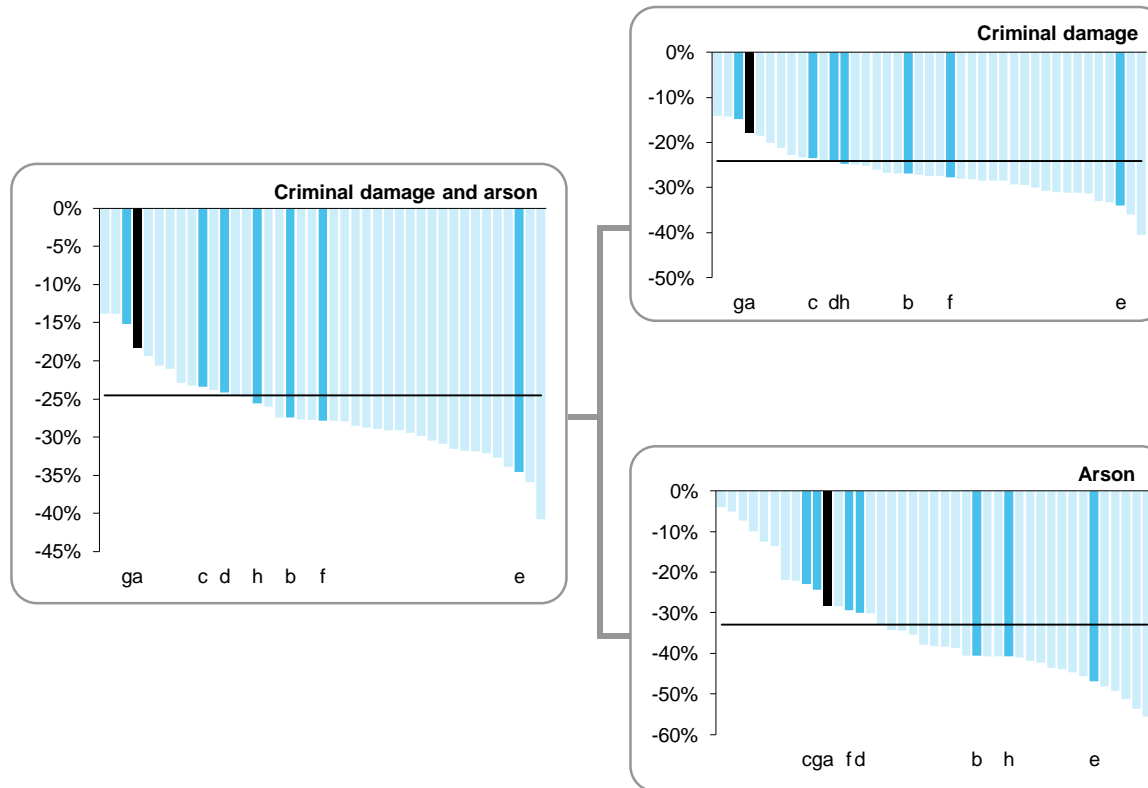

Population	1,469k

What is the former detection rate for other crimes against society in the force and how does this compare with others?

For important information on understanding former 'detection rates' see the introduction to this section. In particular, differences in forces' policies (e.g. on restorative justice, 'taken into considerations' and community resolutions) will impact on former detection rates.

Please note that the former detection rate can be above 100% where detections and crimes are recorded in different time periods. This can be particularly noticeable where crimes are proactively found or have very small numbers. For display purposes all former detection rate graphs have been capped at 100%.

Offences and outcomes - by type

How are different former detection types used by the force and how does this compare with others?

These charts show the proportion of usage for different types of sanction detections in 2012/13 alongside the average proportions for the MSG.

Charge summons refer to when an offender is charged with a crime and can be summoned to court.

Cautions refer to when an offender receives a caution which is officially recorded against their name.

Fixed penalties refer to financial penalties which are recorded on the police national database.

Taken into Considerations (TICs) refer to offences which are considered in conjunction with other offending, often more serious offences. TICs can include crimes that have not previously been recorded, providing the victim confirms that the offence occurred.

Cannabis warnings refer to specific warnings recorded for drugs (cannabis use).

Note that former 'detections' do not cover all detections such as restorative justice, TICs for crimes not previously recorded and community resolutions.

Offences and outcomes - Charges

What proportion of offences result in charges for all crime types and how does this compare with the other forces?

The term charges relates to recorded offences processed by means of charge or summons.

These charts and tables show the charge rates for all crime types for 2012/13 compared with the MSG.

The charges % expected plot shows your actual charges divided by the number of charges you would achieve if you were performing in line with all forces for each crime type. Hence if above/below 100%, you are achieving more/fewer charges than the average. Here a weighted average of forces is used.

Offences and outcomes - Cautions

How are different former detection types used by the force and how does this compare with others?

The term cautions refers to a recorded offence where the offender receives a caution officially recorded against their name.

These charts and tables show the caution rates for all crime types for 2012/13 compared with the MSG average. The difference values show what the force would have achieved if it had matched their MSG average for each crime type.

The cautions % expected plot shows your actual cautions divided by the number of cautions you would achieve if you were performing in line with all forces for each crime type. Hence if above/below 100%, you are achieving more/fewer cautions than the average. Here a weighted average of forces is used.

Offences and outcomes - No crime

What proportion of crimes initially recorded are subsequently 'no crimed' where it is judged by the police that no crime actually took place or was recorded in error and how does this compare for different crime types and to other forces?

These charts show the 'no crime rate' (number of 'no crimes' divided by the number of recorded crimes and the number of 'no crimes' added together) for the last four years. The average no crime rate refers to the 2012/13 average of all forces.

This information gives a more rounded picture of a force's crime recording practices.

A crime could be no crimed where it is considered to have been recorded in error or where, having been recorded, additional verifiable information becomes available that determines that no crime was committed.

	2010/11	2011/12	2012/13	2013/14	
				Force	All Avg
Violence against the person	5.8%	5.1%	7.0%	5.9%	3.1%
Burglary	1.8%	1.4%	1.5%	1.7%	1.7%
Theft from the person	5.8%	4.4%	4.9%	5.1%	5.6%
Rape	10.9%	14.6%	10.7%	10.8%	7.4%
Other sexual offences	10.0%	10.1%	10.3%	10.0%	4.2%
Shoplifting	1.6%	1.3%	1.3%	1.3%	2.1%

Please note:

The proportion of 'no crimes' does not in itself infer high or low compliance with the overall requirements of the Home Office Counting Rules. Levels of 'no criming' are particularly susceptible to local recording practice and the IT systems in use. A police force having a high level of 'no crimes' may be indicative of that force having a local recording process that captures all reports as crimes at the first point of contact and before any further investigation has taken place to consider the full facts. Note that forces have a 72-hour window in which to record a crime once the balance of probability says a crime has been committed.

Annex 5 - % Police Officers and % other staff recorded as on collaboration

Importantly, this year, we have collected more POA data from forces about collaboration. This data is summarised in here, but will not be published in the final profile. The table below shows the proportions of officers and other staff working collaboratively by function. To provide some context to the data, we are asking forces to confirm with the force(s) they are collaborating with that the data on the functions highlighted in blue (where the proportion is greater than 25%) has been recorded in a consistent way and to specify:

- which force(s) they are collaborating with; and
- which collaborative 'model' they have used to provide their figures (lead-force, shared services (i), shared services (ii) or outsourcing model, as per page 13 of the POA guidance).

Where relevant, these forces should provide the above information to us under the notes section of the POA data template under each relevant function. We will provide this information in the final profile to help better

Outliers

This page provides the areas in which the force is an outlier in costs. The force's figures are compared to the spend of other forces. To be flagged as an outlier, the spend must be one of the highest 10% or lowest 10% of any force, and must be at least £1 per head of population. The difference (Diff) calculations are the net cost of the difference in spend to the average per head of all forces.
